ERCC = Experiences Resilience to Climate Change

Further to a call for proposal broadcast in early 2019, Inades-Formation received 149 experiences from 58 actors. Based on criteria set up, a Scientific Committee set up, selected 50 experiences to capitalise. These experiences were undertaken by 40 actors.

Based on a capitalisation guide, delegates of 40 elected actors attended a practical training on the capitalisation methodology. These ones come from 11 countries as imparted per geographical area. There are the following countries namely Burkina Faso, Côte d'Ivoire, Sénégal, Togo for the Western Africa, Chad, Cameroon, DR Congo for the Central Africa and Burundi, Rwanda, Kenya, Tanzania for the Eastern Africa.

A regional workshop for 27 francophones actors was held in Abidjan, Côte d'Ivoire from 24th to 27th September 2019 and the one of 13 anglophones actors held in Kigali, Rwanda from 1st to 4th October 2019.

Workshops enabled to strengthen the knowledge of participants and Partners' organisations on capitalisation's approach and purpose. This one aims at building individual and institutional memory on professional experiences developed and the dissemination of apprenticeships with others to favour networking.

Based on capitalisation support, exchanges carried, and type plan developed further to the workshop, actors are engaged in an approach of production of a document in simple language allowing any interested person to understand the content without being expert of the domain.

From these workshops, dynamics interactive exchanges were created, and they continue. Electronic platform created; more than 200 members registered to participate in the exchanges.

We inform that experiences in progress of capitalisation are classified in two categories. There is the category of experiences that derive essentially from development of area practice. There is also the category on local governance, it deals with classification of experiences that match with community awareness development, Eco community, adoption of collective rules for the management of measures of prevention or fight against climate change problems.

Participants of Abidjan regional workshop, from 23rd to 26th September 2019.

Participants of Kigali regional workshop, from 1st to 4th October 2019.
