Strengthen the capacities of West African POs on local storage: a long-term regional training scheme

The training curriculum

It is designed to strengthen the capacities of POs on food stock management
 and it promoted good practice in:

Governance

legal status, decision-making and management bodies, accountability, etc.

Technical management

purchasing, storage, conservation, standards, information, etc.

Financial management

accounting, resource mobilisation, market risk management, responding to calls for tender, etc.

Some achievements

8,026 → **160**

direct beneficiaries,
 33% of whom are women

POs involved in training

487

elected representatives and technicians from POs trained at national workshops, 27% of whom are women

7,569

stock managers trained in grassroots POs

1

regional training institution

16

national relay institutions

86

regional trainers (pool)

Technical and professional partners

Financial partners

Making the most of what you've learned

82%

of trained stock managers use shared tools and methods

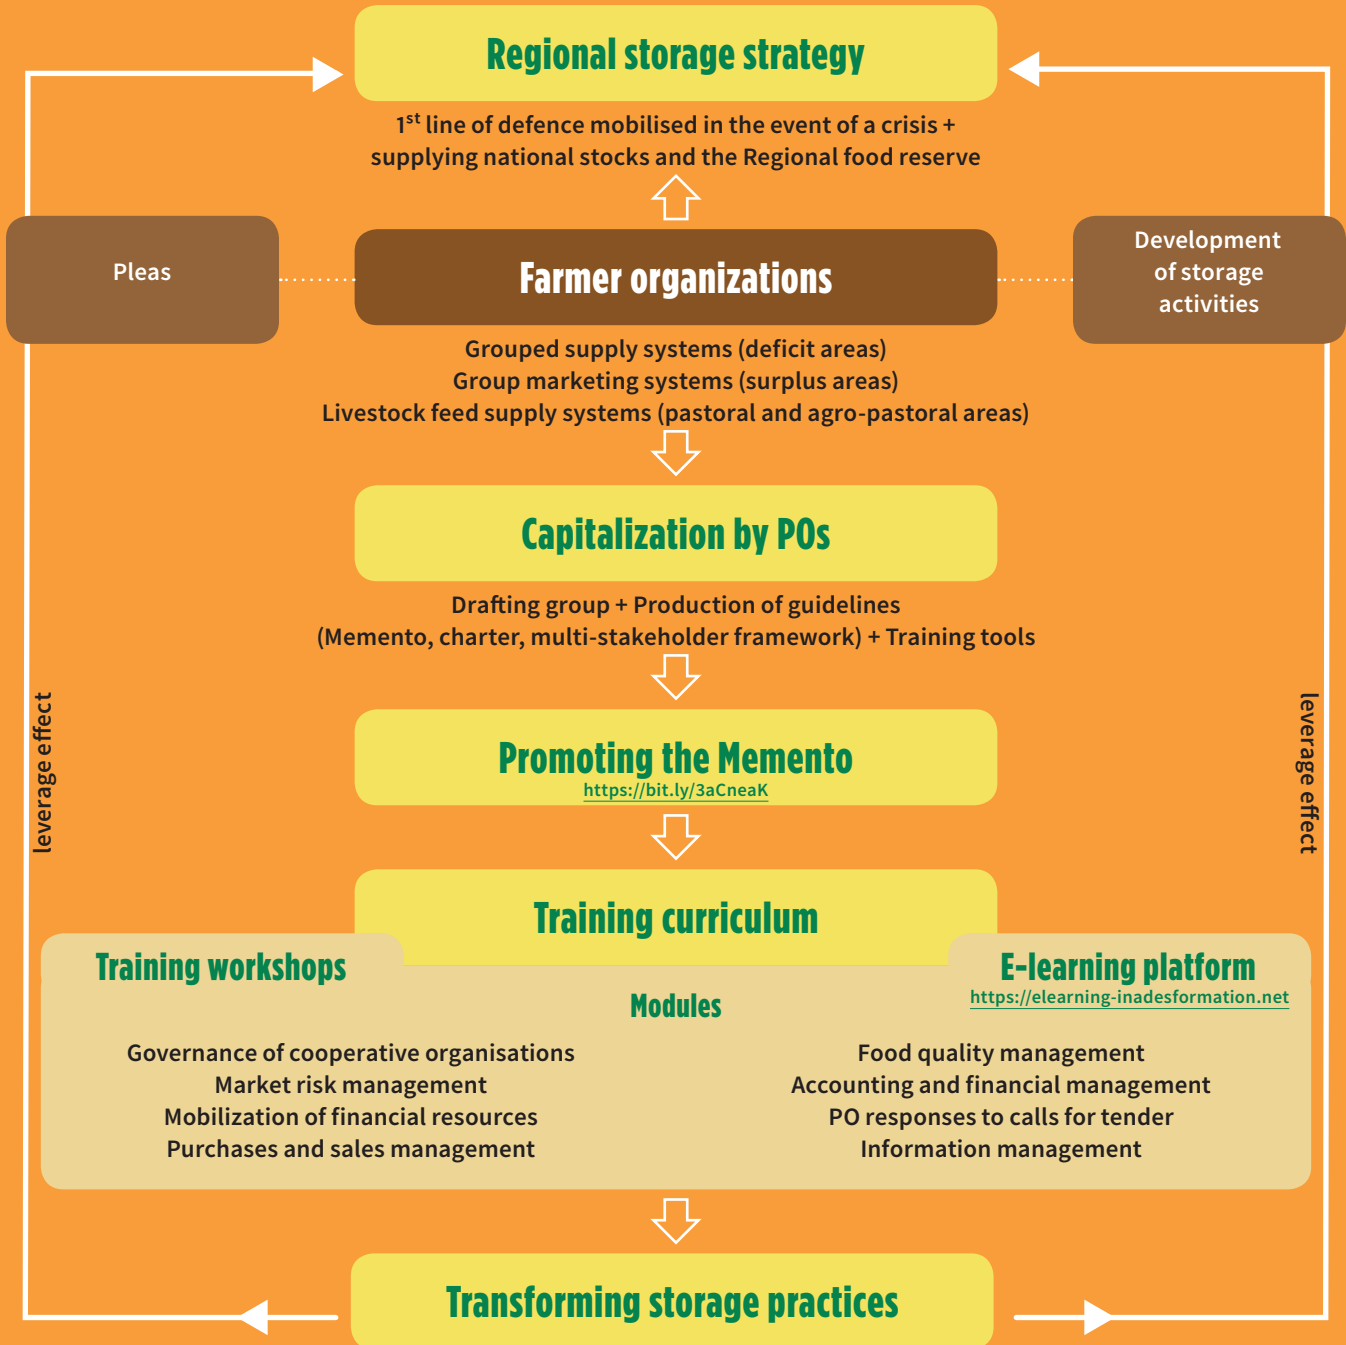

83%

of POs involved in the training curriculum have conducted a quality assessment of their stock management system

87%

of POs involved in the course have drawn up a strategic plan for financing their storage activities

Overview of the capitalisation and training mechanism
